DETAILED ACTION

Status of claims

1. This is in response to applicant's amendment and response filed December 20, 2006 in which claims 1-33 have been deleted and claims 34-68 are pending.

After further search and examination of the present application and in view of applicant amendment and response, claims 34 through 66 are found to be in condition for allowance.

Allowable Subject Matter

2. Claims 34-68 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance: Rasanen et al (US 7000,030) an inter-working method and apparatus for data connection between first and second terminal and negotiating and mapping is performed for error correction (see abstract).

On the other hand, the present application specifically discloses checking the result of said setup processing so as to indicate whether or not the setup processing according to the first protocol features has been successful; and, when the checking step indicates that the setup processing was not successful, establishing said second type of connection between the inter-working function and the called terminal and changing the connection between the calling terminal and the inter-working function to the second type of connection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
